

Explanation of Application documents and family document thereof.

Publication of Japanese PBR Registration No. 10503
(Registered on September 4, 2002)

This publication relates to the control variety
'Sunsenereba' of the present variety.

The family members of Japanese PBR No. 8148 are U.S.
Patent No. PLANT 12122 (Registered: October 2, 2001),
Canadian PBR No. 1595 (Registered: September 26, 2003), CPVO
No. EU8205 (Registered: September 10, 2001), Norwegian PBR
No. 449 (Registered December 11, 2002), Polish PBR (Filed:
June 23, 1999), and Swiss PBR No. 02.685.1453 (April 30,
2002),

'Sunsenereba' (Cineraria)

Registration No.: 10503

Date of Registration: September 4, 2002

Common Name: Cineraria

No photo

Denomination of Variety: Sunsenereba

Term of Validity: 20 years

Name of Owner: Suntory Flowers Ltd.

Address of Owner: 7-2, Koujimachi

5-chome, Chiyoda-ku, Tokyo

Name of Breeder: Kiyoshi Miyazaki

Summary of Characteristics of the Registered Variety

This variety originated from crossing of the variety 'Jupiter Pink-white' and a variety of 'Senecio heritierii', the flower has a color of vivid reddish purple with white center coloration, the flower cluster is large, and the variety is suitable for potting. The growth habit corresponds to type II, and the plant height is high. The stem diameter is medium, the type of primary branching corresponds to type II, the branching is abundant, and the length of internode is long. The leaf shape corresponds to type I, the depth of concavity of leaf margin is deep, the crenation at the margin is acute, the leaf apex is acute, the degree of undulation is weak, the leaf length is short, the leaf width is medium, the diameter of petiole is thin and length thereof is long, and the leaf color (upper surface) is normal. The cluster shape is uneven, the cluster diameter is considerably large, the cluster height is considerably high, the cross-sectional shape of corolla shape is flat, the flower size is large, the size of disk flower is medium, the petal color is vivid reddish purple (J.H.S. 8906), the white center coloration is

present, the size thereof is long, the border of marginal variegation is fairly unclear, the variegation is absent, the color of disk flower is deep reddish purple (J.H.S. 9209), the petal length is long, the petal width is medium, the petal shape and the petal warp correspond to type II, the concavity of petal tip is absent, the shape is of petal tip is rounded, the number of ray flower and disk flower are medium, the polypetaloidy is absent, the degree of recurvature is medium, the calyx lobation is long, the calyx color and the number of flowers per cluster are medium, and the flower fragrance is absent. The flowering time is slightly early. The present variety is distinguishable from 'Rouge Chigasaki' in that the petal color is vivid reddish purple, the petal length is long, the number of flowers per cluster is less than that of 'Rouge Chigasaki' and so on.

Summary of the breeding history of the registered variety

The present variety was selected from seedlings obtained by crossing of the variety 'Jupiter Pink-white' and a variety of 'Senecio heritierii' in an applicant's greenhouse (Hakusyucho, Kitakoma-gun, Yamanashi-ken) in 1995. Afterward, the examination of the characteristics was continued while propagating and the breeding was completed in 1998 by confirming that the characteristics were stable.

登録品種の植物体の特性の概要

この品種は、「ジュピターピンクホワイト」に *Senecio heritieri* を交配、選抜して育成されたものであり、花は鮮赤味紫色に白色の蛇の目が入り大輪となる鉢物向き品種である。草姿はⅡ型、草丈は高である。茎の太さは中、一次分枝の出方はⅡ型、分枝数は多、節間長は長である。葉型はⅠ型、欠こくの深さは深、鋸歯は尖、葉の先端の形は鋭、葉縁の波打ちは弱、葉身長は短、葉身幅は中、葉柄の太さは細、長さは長、葉色（葉表）は中である。花房の形は凹凸型、直径はかなり大、高さはかなり高、花形は平開咲、花径は大、花芯部の大きさは中、花弁の色は鮮赤味紫（JHS カラーチャート8906）、蛇の目（白色部分）の有無は有、大きさは長、境界はやや不鮮明、絞りは無、花芯の色は濃赤紫（同9209）、花弁長は長、花弁幅は中、花弁の形及びそりはⅡ型、花弁先端の欠刻の有無は有、形は丸、舌状花数及び筒状花数は中、八重咲き性は無、がくの形は中、切れ込みの深さは長、色及び一花房花数は中、花の香りは有である。開花期はやや早である。「ルージュ茅ヶ崎」と比較して、花弁色が鮮赤味紫であること、花弁が長いこと、一花房花数が少ないこと等で区別性が認められる。

登録品種の育成の経過の概要

この品種は、平成7年に出願者の温室（山梨県北巨摩郡白州町）において、「ジュピターピンクホワイト」に *S. heritieri* を交配し、その実生の中から選抜、以後、増殖を行いながら特性の調査を継続し、10年にその特性が安定していることを確認して育成を完了したものである。
